

Night Picker is proud to publicly promote our ethical, for-profit business model. Julie Guyard, Founder

To help us uphold our mission to help reduce food waste & closures within the restaurant industry, and to help make business more ethical & transparent in the future, we have created the following Night Picker Promise Statements:

Merchants

We promise to provide participating restaurants access to the Night Picker platform without fees, commissions or imposed reductions. We promise to engage all 3rd party services with the understanding that any and all services offered by or within the Night Picker platform will offer 'best-market value'.

Content & Data

We promise to prioritize the promotion & improvement of participating restaurants, and the restaurant industry as a whole when monetizing and/or using data and/or content generated by Merchants and/or Users, whether it's their personal and/or business information and/or their work product and/or that of their employees and/or colleagues.
